

STUDENTDROP AI

Explainable AI-Powered Early Warning System

An intelligent solution for predicting and preventing student dropout through data-driven insights and timely interventions.

Pillar 5: Capstone Project

Every Student Lost Has Financial and Academic Impact

Dropout reduces overall graduation rates

Lowers student satisfaction and engagement

Risks accreditation and damages reputation

Too Late =
Lost Students + Lost Revenue

Impact Flow

- 10,000 Students Enrolled
- 10% Dropout Rate = 1,000 Lost
- Millions in Tuition Revenue Lost
- Retention is a Financial Priority

Student retention is both an educational and financial priority.

Predict Before Students Leave

Student Data

Academic, Attendance,
Financial &
Demographics

ML Prediction

Early identification of
at-risk students

Explainable AI

Transparent AI
explanations for risk
factors

Intervention

Risk Score + Targeted,
timely interventions

StudentDrop AI predicts risk early and explains why students are at risk.

Small Improvements Generate Significant Returns

10,000

10%

15%

\$750K

Students Enrolled

Dropout
Baseline Rate

Reduction Target

Annual Tuition
Revenue Protected

Even modest improvements in retention create measurable financial benefits.

Monitor Student Risk in Real Time

Total students tracked with High / Medium / Low risk counts at a glance

Retention rates, graduation trends & revenue protected estimate

Top risk factors identified per student cohort

Advisor workload balanced with actionable intervention insights

Decision-makers can quickly identify where intervention is needed.

From Prediction to Student Success

Step 1: Prediction
AI flags at-risk students early

Step 2: Advisor Review
Human advisor reviews AI insights

Step 3: Personalized Intervention
Tailored support plan activated

Step 4: Follow-up & Retention
Monitor progress, confirm success

Workflow

- Tutoring
- Financial Aid
- Counselling
- Mentoring

AI supports human decision-making rather than replacing advisors.

Creating Value Across the University

- ▶ Students: Receive timely, personalized support
- ▶ Advisors: Focus efforts on highest-risk students
- ▶ Faculty: Improve student academic outcomes
- ▶ Management: Boost retention, protect revenue

Responsible, Transparent, and Ethical AI

Potential Risks

- Bias in data or models
- Privacy concerns
- False positives / negatives
- Over-reliance on AI decisions

Mitigations

- Explainable AI for transparency
- Human review & accountability
- Continuous bias monitoring
- Strong data governance & privacy controls

AI assists decision-making while humans remain accountable.

A Four-Phase Deployment Plan

Phase 1

Data Collection &
Integration

Phase 2

Model Development &
Validation

Phase 3

Pilot Deployment &
Feedback

Phase 4

University-wide Rollout &
Scaling

Deployment can be completed incrementally with measurable outcomes.

Transform Student Retention Through Predictive AI

Today: Student withdraws → University reacts

Future: AI detects risk → Advisor intervenes → Student succeeds

StudentDrop AI enables universities to shift from reactive intervention to proactive student success—improving retention, graduation outcomes, and institutional sustainability.

Invest now to secure your university's future →
